PETITION TO THE GOODHUE COUNTY COMMISSIONERS FOR A SAFE RENEWABLE ENERGY PLAN

We, the undersigned, believe a renewable energy plan must not endanger our four most important non-renewables: Our families, our homes, our community, our land.

For primary reasons of health and safety associated with noise, shadow flicker, and many other concerns pertaining to Industrial wind turbines,

WE AGREE, AND ASK Goodhue County Commissioners to adopt a minimum setback distance of ½ mile or more from homes based on peer reviewed medical and sound studies, protection from ice and blade throw, The U.S. National Research Council, and The World Health Organization.

If more study is necessary by the Goodhue County Commissioners, we ask for an interim ordinance moratorium.
